Part III DETAILED ACTION

Notice to Applicant(s)

1. This application has been examined. Claims 11 and 12 are pending.

Information Disclosure Statement

2. The references listed in the Information Disclosure Statement dated 6/14/04 have been considered by the Examiner and is attached to this Office Action.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

4. Claims 11 and 12 are rejected under 35 U.S.C. 102(e) as being anticipated by Shiraiwa (U.S. 6,611,621).

Art Unit: 2626

With respect to claims 11 and 12, Shiraiwa discloses a computer which displays a print acceptance screen (figure 5A) on the basis of page data sent from a given node (column 8, lines 63-67), the print acceptance screen comprising: a first area for a user to specify a peripheral device to acquire print data (which reads on Input Apparatus, figure 5A); a second area for a user to specify a given condition when the peripheral device acquires the print data (which reads on Color Management method or specification data); and a third area for a user to specify a printer made to print on the basis of the print data (Output Apparatus) and wherein the computer acquires the print data from the peripheral device specified in the first area in accordance with the given condition specified in the second area and sends an acquisition/print request for printing to the printer specified in the third area (column 8, line 63 to column 11, line 27).
